DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-40, 43-53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bouzek applied as of record in view of Deininger, U.S. Patent 5,217,584.

The Bouzek patent does not disclose that the aqueous hydroxide solution comprises a mixture of at least two hydroxides; rather it uses either sodium or potassium hydroxide.

The reference does not disclose the use of an alkaline earth metal hydroxide as well as the concentration of the mixture of the hydroxides, electrode and the superimposed current over the DC.

The secondary reference to Deininger discloses the use of either the alkali metal hydroxides or the alkaline earth metal hydroxides to form the ferrate (see claims 6 and 20). It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the two known compositions of hydroxides useful in formation of ferrate salts, because such combination to form a composition has been held to be within the skill of the ordinary artisan unless said combination provides an unexpected result. *In re Susi* 169 USPQ 423, 426 (CCPA 1971). Further the modification the concentration has been well settled to be within the skill of the ordinary artisan. The shape and purity of the electrodes are likewise obvious modification well within the skill of the ordinary artisan. Additionally, the modification to superimpose a sinusoidal current over the DC would have been an obvious modification,

because such superimposition is routinely used in the art to provide increased current and thus an increased product.

Response to Arguments

Applicant's arguments with respect to claims 1-40, 43-53 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
